Insurgency sandstorm server guide 2019 2020 release date

Install the "AWOP Weapon Mod Patches" - in installer, choose Impact, EVE and WMX options, and then "EVE All DLC" and then "WMX All DLC Merged" options. Then install as usual. Audible Pass Through Bushes Sounds No More Double Open And Close Sounds FOV Slider Tweak your FOV to any value you want and for every case, in cozy MCM. Stimpak Hotkey/Hotkey itself can be configured in .ini file. Note: Use the version 3.7 of the mod. [or] Goodsprings Filter + Interior Expansion-Goodsprings [or] Buenas Fuentes - A Goodsprings conversion Really original and vibrant overhaul of Goodsprings, but not very lore-friendly. [or] Goodsprings Overhaul My personal favourite atm. If you wanna more cinematic look, you can try my Seven Sins ENB. Additional recommendations for graphics mods: do NOT use any mods from [Weather & Lighting], [Character Overhauls] and [Landscape Overhauls] sections. Incompatible mods list (do not use them with NC, at all, they will cause crashes and/or other direct game-breaking issues): TTW (Tales of Two Wastelands), Simple DLC Delay, Roleplayers Alternative Start Fallout New Vegas, LevelUpNoLock, Human Plague Perk, Boosted Skill Effects, Delay Level Up, ELECTRO-CITY - Relighting the Wasteland, Enhanced NPC Awareness, ST Robot Race, Honest Hearts Reborn, Threshold, Awesome Crippling Effects, Ghoulified - Immersive Playable Ghoul, Bellevue Bill Regal Rises, PCB Hotkey, Fallout Who Vegas - Complete. Mod list: Project Nevada Choose all options during installation. Here, I won't be recommending much from myself (besides just a few mods that I see a real "champions" and absolutely essential) but mostly just list some qualitative mods in general - which one to use it's all about your taste :) My only direct recommendation is not install them all and not install too much in general - as practice shows, if you'll install several dozens of weapon/armor mods, you still won't find/use most of them during walkthrough, so pick up ones you really like and also sure you'll be using in actual gameplay. Once again, a heartfelt thanks to each and every of you, for being awesome and making awesome mods! Separately, I want to huge thanks to each and every patron of mine, existing and past ones, who helped me to keep going and deliver New Vegas U.L.T.I.M.A.T.E. modding guide - without your support, I would never be able to have enough time to compile it
